Oxygen offers the beauty of youthfulness. Oxygen fights free radicals in the skin which are responsible for aging. It triggers the production of collagen that is a firming and skin tightening natural skin agent.

## **Advantages:**

wrinkles reduced, fine lines diminished and age spots lightened. Thus, the skin regains its youthful appearance.

Also for men

# **Oxygen is essential for life, including your skin**

**Just like oxygen acts as a fire extinguisher to your anxiety,  
it can also act somewhat the same for your skin!**

**One of the best anti-inflammatories for skin is oxygen!  
Additionally, oxygen is amazingly beneficial for your cells.**

### **KOLLER MILK O<sub>2</sub> Treatment**

When the oxygen level in the cell decreases, the cells will start to decay, and soon die. Oxygen increases cell metabolism, which escalates the production of new cells. The more oxygen your skin obtains, the more energetic your skin will appear.

So why does oxygen work to make our skin smoother and softer?

The theory behind oxygenated beauty is that we all need oxygen for survival.

Oxygen is what revives and replenishes the cells in our body. However, due to the pollutants in our environment today, our oxygen content has been greatly reduced. It is also a fact, that as we age, oxygen does not reach our skin cells as efficiently, which is what leads to the aging process.

If you want beautiful, glowing, clear skin then you need **KOLLER MILK O<sub>2</sub> Treatment**.

**A 20-minute bath cycle in our oxygen enriched bath is enough for results that convince.**

# ***KOLLER* MILK O<sub>2</sub> Treatment is the fountain of youth for body and soul**

**Your biological clock is set  
backwards by years**

**This bath will give you a wellness treatment like no other!  
Tiny oxygen rich microbubbles will cover you in a silk  
blanket leaving you feeling rejuvenated.**

**Your skin will feel fresh, clean and moisturized.**

**Not only is oxygen applied to your skin, you also  
inhale an infusion of negative charged ions which  
are known to improve serotonin levels in the brain.**

**As a result, you will feel a deeper relaxation  
and a better well-being.**
